Vented gas log sets are for use in fully functioning wood-burning fireplaces with the damper wide open. Glass doors must be wide open when burning for proper ventilation, proper combustion and cooling of safety control valves. The burners are designed to burn with a yellow, smoky, wood-like flame that will produce carbon soot which must be fully exhausted up the chimney. Vented gas logs are not a cure for a smoking chimney.

Vent-free gas log sets are for use in wood-burning fireplaces or approved vent-free firebox enclosures. Glass doors must be wide open when burning for proper ventilation, proper combustion and cooling of safety control valves. With adequate combustion and ventilation air the damper may be closed for vent-free use. The damper may be opened slightly for reduced venting. Check local codes and ordinances for permitted uses. Vent-free gas logs are the only safe alternative for burning in vented fireplace with smoking (venting) issues.

Read the installation manual thoroughly before installation and use of a gas log set.

All Chillbuster Gas Log Heaters feature state-of-the-art lanced port, opposed louver aspirated burners for clean, efficient burning and proven performance with embers and coals.

Rasmussen Gas Logs. Rasmussen uses real pieces of wood to develop its log patterns and a painstaking molding process to reproduce the finest detail. Rasmussen logs are of the Ceramic Bonded Refractory Concrete type. Rasmussen uses a high-heat resistant, high alumina refractory cement with a maximum temperature rating of over 2300 degrees F, lightweight expanded shale aggregates and rigid steel rod reinforcing for strength and durability. All of Rasmussen's logs are hand colored with a multi-step, up to six color process utilizing environmentally friendly Rasmussen non-paint based ceramic colorations which remain colorfast under fire and which do not create any odor when burned.

WE DO CUSTOM - Contact us for assistance with large and unusual vented fireplaces and fire pits.

Gas Logs for Rumford Fireplaces

Traditional Rumford Fireplaces have a wide front, narrow back, shallow depth and a height nearly as tall or taller than its width. They have a unique aerodynamic throat and smoke chamber that create greater efficiency than traditional fireplace designs.

- Rasmussen has designed these two Tipi stacks to fit within the Traditional Rumford Fireplace Dimensions listed below.
- Model numbers for the Rumford Log Sets are keyed to Traditional Rumford Fireplace Dimensions, not the size of the logs.
- These Tipi sets are intended for use with the Tipi/Andiron Burner (“TNA” and “TNA-E” models).
- These sets may be used in fireplaces with more standard tapers and depths, but you may need to step up to the next size and/or add individual logs in order to satisfactorily fill the fireplace opening. Please contact Rasmussen if you need sizing and product selection assistance.

Traditional Rumford Fireplace Dimensions

Rumford F/P Size	Front Width	Rear Width	Depth	Opening Height
24	24"	13.5"	12"	24" – 28"
30	30"	13.5"	12"	28" – 32"
36	36"	13.5"	14"	32" – 38"
42	42"	15"	15"	38" – 42"
48	48"	18"	16"	42" – 48"
60	60"	22.50"	20"	45" – 54"
72	72"	24"	24"	45" – 60"

Retiring Tipi (RF-R) Short Vertically Stacked Logs for use with TNA Burners.

More information on Rumford Fireplace design can be found at www.rumford.com

("T") Tipi/Andiron Burner

Includes: Burner; Sand (Natural Gas pan filler) and or Volcanic Ash (Propane pan filler or Natural Gas Decoration); Ember Magic; Connector Kit; Damper Clamp; Instructions.
Grate not included or needed.

- Evening Series Logs and your favorite pair of andirons (not included)
- Retiring Tipi Logs
- Rumford Tipi Logs

The Enhanced Burner has an additional, larger front burner element, which provides for more front flame. Use in deeper fireplaces and with Rumford Tipi and Evening Series Logs.

"PL" - Yellow flame. For Natural Gas.

"PLL" - Has air mixer for bluer flame. Propane or Nat. Gas

"TPL" - "T" burner. Yellow Flame. For Natural Gas.

Pan Burners for Vented Installations

NOTE: Burners for Vented Sets are for use ONLY in fully functioning fireplaces in which it is safe to burn wood and with the damper wide open. Glass Doors must be wide open when burning for proper ventilation, proper combustion and cooling of safety control valves and components.

All Rasmussen **Vented Pan Burners** are constructed of heavy 16-gauge steel, with ½” schedule-40 pipe (not light duty tubing) for the main burner tube and ¼” steel tubing for the ember booster portions of the FX burner. All seams are welded for maximum performance and durability. Rasmussen vented pan burners utilize a pan filler, which completely covers the burner tube(s). The gas pressurizes beneath the filler, then breaks through into a dancing, smoky, wood-like flame. Pan filler varies with gas type: White Sand for Natural Gas; Black Volcanic Ash for Propane (plus an air mixer and orifice).

Safety pilots are required for all Propane installations (see Page 18 for more information).

Have the factory assemble an “EASY” Safety Control to any of the following gas log burners up to and including the 30” set size: F, FX, CS, CXF (not including "DF" Double Face). To order, suffix the burner kit item number with the “EASY” Safety Control item number. The price is the sum of the Burner + Easy Control + \$30.00 list

For Example: B24FXH-RMC1E-N \$207 + \$430 + \$30 = \$667.00 list

("F") Vented Hearth Kits

Include: Burner; 5/8” Grate (1/2” on 12” & 15” sets); Sand (Natural Gas pan filler); Volcanic Ash (Natural Gas decoration or Propane pan filler); Ember Magic; Connector Kit; Damper Clamp; Instructions.

“LC” & "LD" Multi-Burner Hearth Kits for Vented Installations

The LC and LD Multi-Burner Hearth System provide a full flame and tiered ember glow in a hearth kit well suited for larger fireplaces with taller openings. Made of the same high quality materials as our Flaming Ember series, it combines a dedicated lower burner for a large ember bed and front flame with an upper burner directly beneath the logs for a taller, fuller flame and upper ember glow.

The LC Hearth Kits were designed specifically for use with the TimberFire (PH) logs (see Page 3), but work equally well with your favorite “Evening” series log style.

The LD Hearth Kits are designed specifically for the larger TimberFire (PH) logs. Custom log stacks may also be created for use on these systems.

LC and LD Burner Kits include: Upper and Lower Burners; 5/8” Grate; Sand (Natural Gas pan filler); Volcanic Ash (Natural Gas decoration or Propane pan filler); Ember Magic; Connector Kit; Damper Clamp; Instructions.

AMERICAN/CANADIAN NATIONAL STANDARDS CERTIFIED "YELLOW FLAME" Vented Hearth Kits

"Yellow Flame" sets are certified to ANSI Z21.60/CGA 2.26. They burn with a smoky, wood-like flame that produces soot. Use only in fully functioning wood burning fireplaces with the damper wide open. Glass doors must be wide open when burning for proper ventilation, proper combustion and cooling of components. **"Yellow Flame"** Hearth Kits include: Assembled Burner/Grate/"EASY" Safety Control Assembly; Sand (natural gas pan filler) or Volcanic Ash (propane pan filler); Ember Magic; Connector Kit; Damper Clamp; Instructions.

All "Yellow Flame" Kits utilize a standing pilot, which is lighted manually by pushing in the valve knob while lighting the pilot gas with a match. They are available with the following "EASY" burner lighting/control options:

- **"ME" Manual** - turn the valve knob to light the burner(s) and control the flame height.
- **"SE" Remote Ready** - Latching solenoid system that controls the ON/OFF of the burner with the receiver switch or one of five Wireless Remote Transmitter Devices (sold separately - see below). "SE" is not a "millivolt" system.
- **"RE" Variable Flame Height Remote Control** - Light the burner and control the flame height with the hand-held wireless remote control.

Please note: Battery power from the receiver operates the ON/OFF functions of the "SE" and RE" systems.

Please note: All of the above "EASY" options use the same valve body. "ME" models may be upgraded to either "SE" or "RE" functionality by adding either the SE-UP1 or RE-UP1 upgrade kits. Both use a thermocouple pilot.

(Continued Next Page)

All items are subject to availability. Prices subject to change without notice. Possession of price list confers no right to purchase at these prices. All rights reserved. © 2008 Rasmussen Iron Works, Inc.

“YELLOW FLAME” Vented Hearth Kits (Continued)

Please Note: When ordering any "SE" Remote Ready model (which includes the receiver with ON/OFF switch), you should also order one of the Wireless Remote Transmitter Devices found on Page 15 for remote control functionality.

“Yellow Flame” Hearth Kits - Use with the following log styles: BF, EC, ED, ELS, EPR, EXF, LS, ML, PR, S, WB, XF

Safety Lighting Kits for Vented Sets

Safety Lighting Kits provide safety shutdown in the event of an interruption in the gas supply or flameout. They also provide a convenient means of lighting the main burner(s) and controlling the flame height. They are required for all propane installations, advisable for natural gas, and are required for installations in certain jurisdictions.

There are two main categories of Safety Lighting Kits:

1) Standing Pilots (SP) ("EASY" and Millivolt); and 2) Pilot on Demand-Electronic Ignition Systems (EIS)

"EASY" System SPs are available in the following types (all 150,000 BTU/hour maximum capacity):

A) **Manual (SPK3E)** – turn the valve knob to light the main burner and adjust the flame height.

B) **Remote Ready (RPK3E)** – Latching solenoid system that controls the ON/OFF of the burner(s) with the receiver switch or one of five Wireless Remote Transmitter Devices (sold separately - see below). "SE" is not a "millivolt" system. Adjust the flame height manually by adjusting the knob at the valve.

- Wireless Hand-Held Remote Control with Simple ON/OFF or Thermostat feature.
- Wireless Wall Timer •Wireless Wall Switch •Wireless Wall Thermostat

C) **Variable Flame Height Remote Control (RMC1E)** - Light the burner and control the flame height with the hand held wireless remote control.

*****Please note:** All of the above "EASY" options use the same valve body. This means that a "Manual" kit may be upgraded at any time to either "Remote Ready" or "Variable Flame Height Remote Control" functionality with the addition of either the SE-UP1 or RE-UP1 upgrade kits. The all use a thermocouple pilot system.

Millivolt Switch/Remote Ready (RPK1/3) - Light the burner with the included wired wall switch, or with the accessories found on Page 13. Adjust the flame height manually by adjusting the knob at the valve.

There are two main types of EIS: 1) Battery powered; and 2) 120V AC powered

A) **Battery Powered** are designed to be installed either inside or outside of the firebox. When an AC adapter is used, the batteries become a back-up in case of power outage. Can be used with automation system.

B) **120V AC Powered** require the components to be installed outside of the firebox in a "vault" with gas and electricity. They are the systems to use if you require the ignition to be tied into an exhaust fan or for use with a whole-house automation system. No gas modulation control - requires manual valve downstream to control flame height (such as V17, V1, or V2).

"EASY" Standing Pilot Lighting Kits (suffix with "N" for Natural Gas, "P" for Propane)

See Page 10 for information on Factory Assembly of "EASY" Control to Vented Burners

Item	Description	Price Ea	Wt. Ea.

AT1424	1/4" x 24" Aluminum tube for EIS-RS Pilot	7.50
AT1472	1/4" x 72" Aluminum tube for EIS-RL Pilot	12.00
STEV-40	Electronic Ignition Valve, includes variable motor drive	217.00
STEV-MOD1	Control Module	84.00
STEV-WH24	24" Wire Harness	17.00
STEV-BPP	Battery Power Pack	62.00
STEV-REM	ON/OFF Variable Flame Height Remote Control Transmitter	39.00
STEV-AC	Plug-in adaptor for A/C Power Supply	20.00

Replacement Parts for EIS-N135, EIS-N200, EIS-P200

1751-749	Igniter Sensor with 72" lead	80.00
1830-010	Pilot assembly	33.00
620-405	Transformer 120/24 VAC	34.00
722-079	Valve used in EIS-N135	349.00
722-070	Specify NG or LP - Valve used in EIS-N200 and EIS-P200	393.00
780-715	Ignition Control Module used in EIS-N135 and EIS-N200 - non-lockout	280.00
780-845	Ignition Control Module used in EIS-P200 - lockout	329.00
AT1472	1/4" x 72" Aluminum tube for Pilot	12.00

CHILLBUSTER™ GAS LOG HEATERS

All CHILLBUSTER sets are certified to two standards: ANSI Z21.11.2 (Unvented Room Heaters) and ANSI Z21.60 (Vented Decorative Appliance). For use only in wood burning fireplaces or approved vent-free firebox enclosures. CHILLBUSTERS are supplemental zone heaters - they are not intended for continuous use or whole house heating. A complete certified set consists of Chillbuster Logs and Chillbuster Hearth Kit.

DO NOT MIX LOGS AND HEARTH KITS FROM DIFFERENT CATEGORIES OR FROM DIFFERENT MANUFACTURERS. Doing so could result in unsafe operation.

CHILLBUSTER™ LOGS include: Specially designed logs for use exclusively on CHILLBUSTER Hearth Kits. Logs have holes and pins that properly locate the logs in order to promote proper burner performance.

CHILLBUSTER™ HEARTH KITS include: Assembled burner/grate/safety control, Oxygen Depletion Sensor (ODS) pilot, connector and fitting, volcanic ash, embers (C8, C5, C7, DFC7, and C2 only), damper clamp.

All Chillbuster Hearth Kits utilize a standing ODS pilot, which is lighted manually by pushing in the valve knob while depressing the piezo spark igniter. They are available with the following "EASY" burner lighting/control options:

- **"ME" Manual** - turn the valve knob to light the burner(s) and control the flame height.
- **"SE" Remote Ready** - Latching solenoid system that controls the ON/OFF of the burner(s) with one of four Wireless Remote Transmitter Devices (sold separately - see below). "SE" is not a "millivolt" system.
- **"RE" Variable Flame Height Remote Control** - Motor drive system that controls the ON/OFF and flame height with the hand-held remote transmitter (included).

Please note: Battery power from the receiver operates the ON/OFF functions of the "SE" and RE" systems.

Please note: All of the above options use the same valve body. This means that "ME" models may be upgraded to either "SE" or "RE" functionality with the addition of either the SE-UP1 or RE-UP1 upgrade kits.

Please Note: When ordering any "SE" Remote Ready model (which includes the receiver with ON/OFF switch), you should also order one of the following Wireless Remote Transmitter Devices for remote control functionality.

Model	Description	Price Ea.	Wt. Ea.
SR-2R	Wireless Hand-held Transmitter with simple ON/OFF function	56.00	2
THR-2R	Wireless Hand-held Transmitter with Thermostat function	88.00	2
TS-2R	Wireless Wall Thermostat Control	110.00	2
WS-2R	Wireless Wall Switch	88.00	2
WT-2R	Wireless 30/60/120 minute Wall Timer	88.00	2
RH2	Ceramic Log House for "SE" & "RE" receivers	35.00	3

Upgrade Kits

SE-UP1	Kit to upgrade from ME to SE functionality. Includes solenoid, receiver and batteries. Requires one of the above Wireless Remote Transmitter Devices.	155.00	2
RE-UP1	Kit to upgrade from ME or SE to RE functionality. Includes motor drive, receiver, transmitter and batteries.	310.00	3

Please Note: The #1 Service Call for Vent-Free sets (for all manufacturers) is the result of clogged ODS pilot air intakes. This is not a warranty issue, but is easily corrected.

Symptom: Either the pilot is hard to light or, after a period of burning, the unit shuts down.

Cause: ODS pilot air intake holes are located at the rear of the pilot assembly near where the pilot gas line attaches to the pilot. They draw in air to mix with the gas for a proper pilot flame. Over time lint and dust can be drawn into the holes with the air, resulting in an improper gas/air mix and a poor pilot flame that results in nuisance pilot outage.

Fix: Clean out the ODS pilot air intake holes with a pipe cleaner or compressed air. In most cases, no parts replacement is needed. This procedure should be accomplished seasonally, or as needed.

Detailed instructions may be found at www.rasmussen.biz/troubleshooting/chillbuster_vent.htm

“C5” CHILLBUSTER™ Evening Embers Triple Burner

Charred and burned-through middle logs, charring on top logs and rear log. Deep bark logs with split accents. C5's opposed louver, lanced port burners provide a massive bed of embers and a split rear flame on a heavy 5/8" grate.

Chillbuster™ CoalFire™ Fireplace Heater

Chillbuster™ CoalFire™ is a vent-free coal-effect gas fire set designed for small, shallow depth Victorian, coal and wood burning fireplaces.

Chillbuster CoalFire is a vent-free coal effect gas fire set designed for:

- Victorian, coal burning or fireplaces which were not designed for burning wood, but has a flue.
- Flue area is very small in comparison to the area of the opening, resulting in spillage of combustion products.
- Chimney is old. As a result, fireplace cannot be used without an expensive reline or reconstruction.
- Shallow depth of the fireplace. Most traditional gas log sets require a minimum of 12" of depth.
- You like the appearance of a coal-effect basket as a pleasing alternative to traditional gas logs
- You want to turn your unused fireplace into a source of heat for the room.

Chillbuster CoalFire Fireplace Heater ("C9" series) incorporates the following features:

- State-of-the-art lanced-port opposed-louver burner, the heart of all Rasmussen Chillbuster vent-free gas logs.
- Two control options: (1) Variable Flame Height Wireless Remote Control (control the flame height like a TV volume control), and (2) Remote-Ready control, which can be operated with a variety of accessories (see Page 21), such as a wall switch, wall thermostat, wall timer or wireless remote control (on/off).
- Heating Unit (burners, coals and control) can be purchased separately to be used with any basket in which the bottom is removed, or purchase with one of the three baskets made by Rasmussen.
- Two sizes of Heating Units: (1) C9A - 33,000 BTU/hour max.; and (2) C9B - 40,000 BTU/hour max.
- The coals are made from the same refractory material from which we make our gas log sets. No potentially harmful ceramic fiber.
- Certified to both the vent-free (ANSI Z21.11.2) and vented (ANSI Z21.60) standards, so CoalFire can be used in vent-free, vented and reduced vent installations.

Chillbuster™ CoalFire™ Specifications:

- Height (to top of burner) = 6.625"
- Height (to top of coals) = 10.5"
- Lowest point of flame = approx. 5 1/8" from the floor. Everything below that is the "guts" of the system (burner venturis, control valve, plumbing). The glow starts at about 5.5" and emanates from the coals as well as the stainless steel pieces that hold the coals.
- Absolute minimum fireplace depth required = 6.5", the maximum forward-most projection of the flame.
- Minimum Fireplace Depth Required for Baskets: Classic = 9.5"; Americana and Moderne = 8.375"

Please Note: When ordering any "SE" Remote Ready model (which includes the receiver with ON/OFF switch), you should also order one of the Wireless Remote Transmitter Devices found on Page 18 for remote control functionality.

Parts for CHILLBUSTER™ and Control Systems (see pages 17/18 for new "E" controls)

Model No.	Description	Price Ea	Wt Ea
C1V	Manual Valve/Reg Assembly for C1(A,B,C,D)-M, DFC1(C,D)-M (specify NG or LP)	129.00	3
C2V	Manual Valve/Reg Assembly for C2(A,B)-M, C8-M,CR(A,B)-M (specify NG or LP)	129.00	3
C4V-R	Dexen/Reg Assy for C2(A,B)-(S,R);C3(A,B)-S;C5(A,B)-S;(specify NG or LP)	260.00	3
C5V	Manual Valve for C3(A,B)-M, C5(A,B)-M, C7-M	72.00	1
YFV	YF and TR Manual Valve/Reg Assembly (specify NG or LP)	162.00	3
V6	Manual Valve with 1/4" compression fitting for CRA-M, CRA-T, CRB-M, CRB-T	25.50	1
V11	Auto Safety Remote for RPK (non-regulated) - White-Rodgers	252.00	3
V11Z	Auto Safety Remote for "Z" kits (ANSI Yellow Flame) - specify NG or LP	262.00	3
V14	Auto Safety Manual for SPK1 - 3/8 FIP x 3/8 FIP side inlet (Copreci)	107.00	2
V15	Auto Safety Manual for SPK3 - 3/8 FIP x 3/8 FIP back inlet (Copreci)	107.00	2
GV34	Valve for RMC, C1-R, C7-R, C8-R (specify NG or LP)	306.00	3
GV34B	Valve for C5-R (specify NG or LP)	306.00	3
SW-1	Replacement Switch for CB "S" millivolt models	19.00	-
ZRP1	Remote Transmitter/Receiver for RMC (GV34 valve)	281.00	2
R1-3.5	Appliance Pressure Regulator, Set 3.5" W.C., for C1 NG. Gas models	31.00	1
R1-5.0	Appliance Pressure Regulator, Set 5.0" W.C., for C2, CR, C3, YF NG. Gas models	31.00	1
R1-10.5	Appliance Pressure Regulator, Set 10.5" W.C., for C2, CR, C3, YF Propane models	31.00	1
ODS-CN	Copreci Oxygen Depletion Sensor Assy for M, R, ME, SE, RE (specify NG or LP)	59.00	1
ODS-OP	SIT Oxygen Depletion Sensor Assy for M, R, ME, SE, RE (specify NG or LP)	59.00	1
ODS-ROP	SIT Oxygen Depletion Sensor Assy for S millivolt controls (specify NG or LP)	132.00	1
J95R	Pilot/Thermocoup. Assy YF & TR "M" models, SPK, RMC;YF ME, SE, RE; SPK3E, RPK3E and RMC1E (specify NG or LP)	24.50	1
J95RADN	Pilot/Thermocouple Assembly for Nat. Gas ANSI Yellow Flame ME/SE/RE	58.00	1
JPG9	Pilot/Multicouple Assembly for YF and TR "S" models, RPK (specify NG or LP)	69.00	1
JPG9C	Thermo-generator for JPG9 ("S" & "R" YF and TR, and RPK)	45.00	-
18T	Thermocouple only for J95R	18.00	-
JPBT	1/8" Pilot Burner Tube for J95R	7.00	-
A204	Pilot Burner Orifice for J95R and JPG9 (specify NG or LP)	7.00	-
TT	Thermocouple Tester	74.00	-
PIEZO	Piezo Ignitor/Pal Nut/Wire Assembly for CB, YF and TR	20.00	1
JK	Knob for C1A-M, C1B-M, DFC1-M, C3-M	8.50	-
JK2	Knob for C2A-M, C2B-M, CRA-M, CRB-M, YF, TR	8.50	-
DK2	Knob for C2A-S, C2A-R, C2B-S, C2B-R, Remote Yellow Flame AGA	8.50	-
CH5-RB	Rear Burner for C2A, CRA models	71.00	2
RAT-1	Front Burner for C2A, M2A models	71.00	2
CE-A18F	Front Burner for C3A models	133.00	3
CE-B24F	Front Burner for C3B models	133.00	3
CE-A18R	Rear Burner for C3A models; Front burners for C5A, C5B	87.00	3
CE-B24R	Rear Burner for C3B models; Rear burner for C5A, C5B	87.00	3
022AR	Burner for C1A, C1B, DFC1 models	77.00	2
RBT-1	Front Burner for C2B, M2B models	77.00	2
038R	Rear Burner for C2B, CRB, M2B models	77.00	2
IR-1	Infra-Red (front) Burner for CRA models	150.00	3
IR-2	Infra-Red (front) Burner for CRB models	160.00	3

VA65	1.3 cu.ft. box	75.00	68

FLAMING EMBERS			
EK	Vermiculite, Embers, Glue	18.00	1.3
REK	Vermiculite, Embers	16.00	1
EMCB	CB Ember Box	7.50	0.13
EM1	1 lb. bulk Ember Fiber	25.00	1
EMX1	6 oz. bag Ember Magic	14.00	0.4
EMX5	3 lb. bulk Ember Magic	35.00	3
GB-1	Glue, brush	7.00	0.5

EXTRA COARSE VERMICULITE GRANULES			
MGX1	1 lb. Bag	14.00	1
MGX5	1280 cu in box	39.00	5
MGX20	4 cu. ft. Bag	72.00	18

PINE CONES - Individual			
PCT-S	2" -Tiny-Small	6.50	0.25
PCT-T	2" - Tiny-Tall	6.50	0.25
PCS-P	3" - Small-Small	7.50	0.5
PCS-H	3" - Small-Tall	7.50	0.5
PCM	4" - Medium	11.00	0.75
PCL-T	Large-Tall	12.00	1
PCL-F	Large-Fat	13.00	1

OAK TWIGS - Individual			
T34	14" -Y Shape	15.00	1.5
T35	14" - Straight	15.00	1.5
T37	12" - Straight	14.00	1
T38	8" - Straight	13.00	0.5
T39	6" - Y Shape	12.00	0.5

Chips, Chunks, Tiny Pine Cone Assortments			
CPCP	6 Chips	37.00	3
CPPT	3 Chips,3 PCT	37.00	2.5
CKPT	3 Chunks,3PCT	42.00	3.5
BOC	6 Chunkers	61.00	5

Cat. No.	Description	Price	Wt.
AUX. VALVES / KEYS			
V1	Straight Log Lighter	60.00	1
V2	Angle Log Lighter	60.00	1
V17	3/8 MIP x 3/8 MIP Manual	36.00	1
V17B	Kit with V17, K5, SL4, A9	52.00	1.5
K1	3" Short Key for V1, V2	11.00	-
K2	9" Long Key for V1, V2	12.00	-
K4	3" Extension for V14, V15	7.00	-
K5	6" Removable Handle for V17	13.00	-

ALUMINUM CONNECTOR			
ACCB	for CB - 18" x 3/8"	11.00	0.35
AC12	12" x 3/8"	8.50	0.25
AC18	15" x 3/8"	9.50	0.3
AC24	24" x 3/8"	12.00	0.4
AC30	30" x 3/8"	14.00	0.5

STAINLESS STEEL FLEX CONNECTOR - BLACK			
SSCB-10	10" x 3/8"	21.00	0.5
SSCB-14	14" x 3/8"	25.00	0.6
SSCB-18	18" x 3/8"	27.00	0.8
SSCB-18-12	18" x 1/2"	38.50	1
SSCB-24	24" x 3/8"	30.00	1
SSCB-24-58	24" x 5/8"	45.00	1

LOG LIFTERS			
LL	Log Lifters	9.00	1

MISC. FITTINGS			
DC1	Damper Stop Clamp	7.50	-
DFE	Double Face Conn. Kit - F	22.00	1
DFFA	Double Face Conn. Kit - F	22.00	1
LN	Pal Nut	3.50	-
MA	Mixer Assy (CA)	18.00	1
MA2	Mixer Assy (FA)	18.00	1

BRASS FITTINGS			
A1	3/8T x 1/2 FIP EL	5.50	-
A2	3/8T x 3/8 MIP EL	5.50	-
A2T	3/8T x 3/8 MIP EL Tap'd	6.50	-
A3	3/8T x 1/2 FIP	6.50	-
A5	3/8T x 1/2 MIP-3/8FIP	5.50	-
A6	3/8 MIP x 1/2 MIP	7.50	-
A7	3/8 MIP x 3/8 MIP Tapped	9.00	-
A8	3/8T x 3/8T Union	7.00	-
A81	1/2T x 1/2T Union	9.50	-
A9	3/8T x 3/8 FIP	7.00	-
O1	7/16-27 Orifice Blank	4.00	-
